

Week 2 Progress Report

Project Title

Deep Learning-Based Structural Damage Detection in Wind Turbine Blades Using YOLOv8 Segmentation

Activities Completed

- Collected wind turbine blade image datasets.
- Analyzed different types of blade damages.
- Studied image annotation techniques.
- Organized dataset for training.
- Explored preprocessing methods.

Work Status

Dataset collection and analysis completed.

Next Plan

- Annotate blade damage images.
- Perform image preprocessing.
- Prepare training and testing datasets.
