

Week 3 Progress Report

Project Title

Deep Learning-Based Structural Damage Detection in Wind Turbine Blades Using YOLOv8 Segmentation

Activities Completed

- Annotated blade damage images.
- Performed image preprocessing.
- Split dataset into training and testing sets.
- Configured YOLOv8 environment.
- Prepared model training setup.

Work Status

Dataset preparation completed successfully.

Next Plan

- Train YOLOv8 segmentation model.
- Monitor training performance.
- Analyze model outputs.
