

For Week 4:

Project Title: Deep Learning-Based Structural Damage Detection in Wind Turbine Blades Using YOLOv8 Segmentation

Activities Completed

- Trained YOLOv8 segmentation model.
- Evaluated model performance on test data.
- Analyzed damage detection results.
- Identified areas for model improvement.
- Recorded performance metrics.

Work Status

Initial model training and evaluation completed.

Next Plan

- Fine-tune model parameters.
- Improve detection accuracy.
- Prepare Streamlit-based user interface.
